Professional Summary

AI Engineer experienced in building AI SaaS products using LLMs, cloud infrastructure, scalable back-end systems and DevOps automation. Skilled in AI workflow automation, prompt engineering, REST APIs and production-ready cloud deployments.

Technical Skills

Artificial Intelligence	Google Gemini, Claude, AI Agents, MCP, RAG, Prompt Engineering, LLM Integration
Cloud & DevOps	AWS, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Nginx
Backend	Firebase, Supabase, PostgreSQL
Monitoring	Grafana, Prometheus, Loki, Promtail, CloudWatch

Featured AI Projects

MockFriend AI-Powered Hiring & Interview Platform mockfriend.in

- Built an AI-powered hiring platform for resume and job descriptionbased interviews.
- Integrated Google Gemini, Claude, Deepgram STT, and Google Cloud TTS for real-time AI interviews.
- Developed scalable REST APIs using FastAPI, Node.js, React, PostgreSQL, and Supabase.
- Deployed production-ready infrastructure on AWS using Docker, Terraform, and Nginx.

Ghotly AI Intelligent AI Workspace Assistant ghotlyai.in

- Built a real-time AI workspace assistant for context-aware conversations and productivity.
- Integrated multiple Large Language Models (LLMs) with conversation memory and prompt engineering.
- Developed secure backend services optimized for low-latency AI interactions.
- Designed a lightweight desktop experience with scalable cloud-native deployment.

ScraperDesk Open-Source AI Website Intelligence Platform scraperdesk.in

- Built an AI-powered website intelligence platform for developers, researchers, and businesses.
- Developed scalable web scraping and AI-assisted data extraction pipelines.
- Implemented privacy-first architecture with REST APIs and workflow automation.
- Engineered reliable backend services for high-volume website intelligence.

Cloud & DevOps Projects

CloudForge – 3-Tier Infrastructure Automation Platform

GitHub

- Designed and deployed a scalable three-tier AWS architecture using reusable Terraform modules.
- Automated infrastructure provisioning and server configuration with Terraform and Ansible.
- Built CI/CD pipelines using Jenkins for reliable and automated deployments.
- Implemented secure networking, IAM, and load balancing following AWS best practices.

Terraform Infrastructure Automation

GitHub

- Provisioned AWS infrastructure using Infrastructure as Code (IaC) with Terraform.
- Developed reusable modules for compute, networking, and storage resources.
- Integrated Terraform workflows with Jenkins for automated infrastructure deployments.
- Improved deployment consistency through version-controlled infrastructure.

Docker CI/CD Pipeline to Amazon ECR

GitHub

- Built automated CI/CD pipelines using Jenkins, Docker, and GitHub.
- Configured Amazon ECR for secure container image management.
- Automated build, test, and deployment workflows for containerized applications.
- Implemented event-driven deployment automation using AWS services.

Centralized Logging & Monitoring using Grafana, Loki & Promtail

GitHub

- Implemented centralized logging using Grafana, Loki, and Promtail.
- Built monitoring dashboards for real-time infrastructure observability.
- Improved troubleshooting with centralized log aggregation and visualization.

Spring Boot Deployment on AWS

GitHub

- Deployed Spring Boot applications on AWS using Terraform and Jenkins.
- Automated application deployment through CI/CD pipelines.
- Configured production-ready cloud infrastructure with EC2 and Amazon RDS.

Certifications

- **Master in Cloud Architecture** – Fortune Cloud Technologies
- **AWS Analytics Assessment** – LearnTube.ai

Education

Bachelor of Computer Applications (BCA)

2022 – 2025

B.P. Sulakhe Commerce College, Barshi

Master in Cloud Architecture

Fortune Cloud Technologies
